

Jean Julliard Prize winners

- 2016: G. Edgren, Sweden
Big data in transfusion medicine – towards a database driven approach to ensuring the long-term health of both blood donors and transfused patients
- 2014: E.A. Hod, USA
Red Blood cell transfusion-induced inflammation: myth or reality
- 2012: P. Horn, Germany
Advances towards in vitro generation of patient-specific cellular blood products
- 2010: M. Looney, USA
The Immunobiology of Transfusion-Related Acute Lung Injury (TRALI).
- 2008: J. Zimring, USA
Unique properties of transfused erythrocytes as inducers of and targets for the immune response
- 2006: M. De Haas, the Netherlands.
High Throughput Genotyping For Red Cell Blood Groups And Platelet Antigens In Transfusion Medicine
- 2004: Jean Julliard Prize not granted.
- 2002: N.A. Watkins, United Kingdom
Molecular characterisation of platelet specific antibodies and antigens
- 2000: M.L. Olsson, Sweden
Analysis of Polymorphisms at the ABO, Fy and Jk Loci for Improvement of Clinical Blood Group Genotyping
- 1998: S. Henry, New Zealand
Molecular and genetic studies of fucosylated histo-blood group systems
- 1996: T.E. Warkenton, Canada
Heparin-induced thrombocytopenia (HIA)
- 1994: Y. Colin, France
Molecular genetics of the RH blood group system
- 1992: F. Yamamoto, USA
Molecular genetic study of histo-blood group ABO system
- 1990: L.T. Sinor, USA
Advances in solid phase red cell adherence methods and transfusion serology
- 1988: D. Blanchard, France
Contribution to the biochemical determination of red cell membrane antigens
- 1986: J. G. Kelton, Canada
Contribution of the reticuloendothelial system to cell clearance

- 1984: W. Dahr, Germany
Molecular biology of red cell membrane sialo-glycoproteins
- 1982: G.J. O'Neill, Australia
The Genetic control of complement C4 (Chido and Rogers) and linkage to HLA
- 1980: D.J. Anstee and M.J. Tanner, United Kingdom
Analysis of erythrocyte membrane proteins in genetic variants of the Mns blood group system
- 1978: J-P Cartron, France
Demonstration of T transferase deficiency in Tn polyagglutinable bloods
- 1975: F. Jorgensen and L.U. Lamm, Denmark
Work on the major LD-Locus within the HLA system
- 1972: J. Pintera, Czechoslovakia
Work on haptoglobin
- 1969: J. Vyas, USA
Immunobiology of human anti-IgA
- 1966: L. Martensson, Sweden
Gm genes and gamma-G-globulin molecules
- 1964: J. Hirschfeld, Sweden
The Gc System
- Dr. Berg, Norway
The Lp System
